50 Learnings from Practical Employability and Skill Enhancement (PESE) Labs.

🎓 Basic Academic & Study Habits

1. Attend classes regularly (attendance matters more than you think)
2. Understand concepts instead of mugging up
3. Revise weekly instead of studying before exams
4. Make short notes for quick revision
5. Ask doubts without hesitation
6. Don’t ignore basic subjects (they help in interviews)
7. Learn from YouTube + class both
8. Study smart, not just hard
9. Practice previous year papers
10. Manage your time properly

💻 Technical Basics (Simple Level)

11. Learn at least one programming language properly
12. Practice coding regularly (not just theory)
13. Understand how the internet works
14. Learn basic computer networking
15. Get comfortable using a laptop efficiently
16. Learn basic Excel, Word, PowerPoint
17. Try small projects instead of only assignments
18. Use GitHub to store your work
19. Learn typing fast (it actually helps 😄)
20. Keep improving your technical basics

▯ Skill Development

21. Improve your communication skills
22. Learn how to speak confidently in English
23. Work on your body language
24. Practice explaining things clearly
25. Learn problem-solving step by step
26. Stay curious and ask “why”
27. Learn from mistakes instead of ignoring them
28. Be consistent (small daily effort matters)
29. Avoid procrastination
30. Stay disciplined

🤝 Social & Networking Skills

31. Make good friends who are serious about growth
32. Learn to work in teams
33. Respect teachers and seniors
34. Take part in group discussions
35. Build connections with classmates
36. Help others and ask for help when needed

🗀 Career & Job Preparation

37. Start thinking about your career early
38. Build a simple resume in 2nd/3rd year
39. Do internships (even small ones)
40. Participate in college events/competitions
41. Learn basic interview questions
42. Practice aptitude questions
43. Keep learning new skills outside syllabus

44. Don’t depend only on college placements
45. Be open to learning new domains

🌱 Personal Growth

46. Take care of your health (sleep + food)
47. Limit social media distractions
48. Stay positive but realistic
49. Learn patience (growth takes time)
50. Believe in improvement, not perfection
